

PRASHANT PATIL

DevOps Engineer | CI/CD | AWS | Kubernetes

Pune, Maharashtra, India | +91 93730 34327 | prashant.patil25@outlook.com | linkedin.com/in/prashant-patil | github.com/oneupon2

PROFESSIONAL SUMMARY

DevOps Engineer with 3.2+ years of experience building CI/CD pipelines, automating infrastructure provisioning, and managing containerized, cloud-native applications on AWS. Skilled in Docker, Kubernetes, Terraform, and Infrastructure as Code (IaC), with hands-on experience administering cloud infrastructure (EC2, S3, RDS, DynamoDB, IAM, CloudWatch), including large-scale environment migrations (OCI-Exadata to AWS@Exadata), and monitoring systems (Datadog, Splunk, Grafana). Proven ability to streamline deployment workflows and improve system reliability, scalability, and release efficiency.

CORE SKILLS

CI/CD | Jenkins | GitLab CI/CD | Docker | Kubernetes | Terraform | Infrastructure as Code (IaC) | AWS (EC2, S3, RDS, DynamoDB, IAM, CloudWatch) | Linux | Datadog | Splunk | Grafana | Cloud Computing | DevOps | Python | Core Java | Machine Learning | Angular | Jira | Salesforce | ServiceNow

PROFESSIONAL EXPERIENCE

NASDAQ - Pune, India

DevOps Engineer | Aug 2023 - Present

- Applied Terraform for Infrastructure as Code (IaC) automation, streamlining cloud resource provisioning and configuration management.
- Delivered infrastructure upgrades and enhancements using IaC methodologies, improving platform stability, maintainability, and release velocity.
- Designed and managed containerized applications using Docker, improving build consistency, scalability, and deployment efficiency.
- Deployed and orchestrated cloud-native applications using Kubernetes, enhancing system availability, fault tolerance, and release automation.
- Administered AWS cloud infrastructure (EC2, DynamoDB, S3, RDS, IAM, CloudWatch), supporting CI/CD pipelines and production monitoring.
- Contributed to the implementation of AWS@Exadata, migrating environments from OCI-Exadata to AWS as part of infrastructure modernization, coordinating cutover activities to minimize downtime and ensure operational continuity.
- Identified system improvements and raised enhancement tickets to refine product features, deployment processes, and implementation strategies.
- Maintained Confluence documentation, keeping CI/CD runbooks, operational procedures, and best practices current.

Adenza - Pune, India

Cloud Intern | Jan 2023 - Aug 2023

- Automated deployment and environment provisioning using Jenkins, streamlining CI/CD build and release processes for client environments.
- Monitored system performance and infrastructure health using Datadog, Splunk, and Grafana, improving observability and troubleshooting efficiency.
- Managed and optimized relational databases, including PostgreSQL and Oracle, ensuring data integrity and performance.
- Provided technical support and resolved customer issues through Jira, Salesforce, and ServiceNow, enhancing client satisfaction and operational efficiency.

PROJECTS

Medical Image Classification Using CNN-Based Model - Researcher

Feb 2023 - May 2023

- Authored a research paper on pneumonia detection using a CNN-based model (ResNet V2).
- Built a model that classifies chest X-ray images to determine the presence of pneumonia.

Sasta OLX - Angular (Academic Project)

- Designed an e-commerce platform similar to OLX using Angular, with product browsing, posting, and purchase features.
- Implemented user authentication (login/signup) using Firebase and built a custom carousel using Angular directives.

CERTIFICATIONS

- edX Verified Certificate - Introduction to Linux
- edX Verified Certificate - AWS Cloud Practitioner Essentials
- Nasdaq AxiomSL v10 Associate Technical Certification
